

IN THE CLAIMS:

Please amend claim 33 to read as follows:

Sub. 7
G3
H

1 33. (thrice amended) A housing for installation in a window frame having a
2 window sash with a notch defining a pair of opposed edges, the housing comprising:
3 a first part defining exterior side walls having edges;
4 a second part separate from said first part and defining interior side wall
5 nested in the exterior side walls and a top wall extending beyond the interior side
6 walls to define a flange, the edges of the exterior side walls being spaced from the
7 flange; and
8 protuberances projecting from the edges of the exterior side walls and spaced
9 from the flange to define respective gaps for receiving the respective edges of the
10 notch therein.

Please add new claim 34 as follows:

34
#2

1 34. (new) A housing for installation in a window frame having a window sash
2 with a notch defining a pair of opposed edges, the housing comprising:
3 a first part defining exterior side walls having edges;
4 a second part separate from said first part and defining interior side wall
5 nested in, and generally parallel to, the exterior side walls and a top wall extending
6 beyond the interior side walls to define a flange, the edges of the exterior side walls
7 being spaced from the flange; and
8 protuberances projecting from the edges of the exterior side walls and spaced
9 from the flange to define respective gaps for receiving the respective edges of the
10 notch therein.
